

English – Compliance / Product Information

Product name: Vehicle Sliding Window Ventilation Insert

Material: Plastic, integrated insect mesh

Intended use: Ventilation insert for original vehicle sliding door windows. Intended to improve airflow while the vehicle is stationary, such as during parking or overnight use.

Product description:

The ventilation window is designed to fit into the vehicle's original sliding window opening, allowing secure ventilation while preventing insects from entering.

This updated version features an increased ventilation area and an improved triply periodic minimal surface (TPMS) mesh for enhanced airflow. Locking tabs have been improved for more secure installation, and mounting is simplified through optimized internal geometry.

An integrated rain protection system with additional drainage channels helps direct water away.

Safety information:

- This product is an accessory and does not replace any vehicle safety components.
- Intended for use only when the vehicle is stationary.
- Ensure the ventilation window is properly installed before use.
- Do not use the product if damaged or deformed.
- Not a toy. Keep out of reach of small children.

Installation & compatibility:

- Compatible only with original sliding door windows of the specified model type.
- Not compatible with aftermarket windows.
- Vehicles may have asymmetric windows – separate left and right variants are available.
- Check product images or videos to confirm compatibility prior to installation.

Insect mesh:

- Integrated insect mesh with approximately 0.8 × 0.8 mm mesh size.
- Allows airflow while preventing insects from entering.

Material & environment:

- Manufactured in Sweden using materials sourced in Sweden.
- Dispose of according to local regulations for plastic waste.

Regulatory compliance:

- Complies with the EU General Product Safety Regulation (GPSR).
- Does not contain intentionally added hazardous substances in accordance with REACH.
- RoHS not applicable (no electrical or electronic components).
